

## DRAW A LINE IN THE SAND – PARENT TESTIMONIES

July 2010

---

Ava began the protocol in February of 2009. I would say we have seen subtle differences in Ava. She has become more curious about her world and labeling much more than she did before. She has become very balanced. We have seen great strides with her gross motor skills. She is very athletic and seems to be more balanced. She can do monkey bars, pedal a bike, and many people comment on her strength and athletic ability.

Ava has always been a good reader, but her comprehension has really started to show through with the books that she reads.

Ava will be six years old in August, and is heading to kindergarten reading books up to a second grade level.
