

## DRAW A LINE IN THE SAND – PARENT TESTIMONIES

July 2010

---

Avery is three years old as of June 12, 2010. We have been very blessed to have discovered the CMF protocol. Avery started on the protocol a year ago this past spring. Avery flourishes with each task she is asked to do. Her speech is also blooming every day. She is capable of staying focused without redirection. All of her therapists and teachers have been astounded by the positive changes in Avery. The protocol and all of the people in her life have opened Avery's world.

Our family has realized all new hopes and aspirations for Avery. We pray the researchers will continue to move forward discovering new treatments for our children.

Bless you all,

The Gradys
