

DRAW A LINE IN THE SAND – PARENT TESTIMONIES

July 2010

My beautiful daughter Lauren started on the protocol at 17 months. She was not a typical 17 month old, she had no words, limited sounds and the thought of her walking and talking in the near future was becoming increasingly negative. Very shortly after starting her on the protocol it was like a light turned on inside her. She began forming words and communication became something we started with her. She is an amazing child, I know every parent thinks their child is amazing but she has hundreds of words, reads books, walks, runs and plays with other typical children at their level, has more signs than her parents and is almost completely potty trained. By the way she is only 3 1/2 years of age. We were very skeptical of the protocol but finally came to the conclusion if we don't try something, what are we possibly taking away from our child. It's hard to say as a parent "What if this hurts my child in the future" the conclusion we came to was what if we don't do this, what experiences will she be missing out on.

Lauren is an amazing child with many incredible qualities. We are truly blessed to have her and believe the protocol is a major reason she is where she is today.

A loving parent,

Todd Gongwer
